Postdoctoral Position in Gravitational Wave Physics
at the University of Tübingen, Germany [Position II]
Deadline for applications: February 15, 2019

The Theoretical Astrophysics section (TAT) at the University of Tuebingen has an opening for one postdoctoral research position funded by DFG starting from 1st of October 2019. Earlier starting dates can be considered as well.

The successful applicant will carry out original research in projects focusing on the dynamics of rotating neutron stars in relation to the emission of gravitational waves.

The research activities of TAT are related to the study of sources of gravitational waves with emphasis on the dynamics of neutron stars and black holes. The group currently consists of four (4) post-doctoral researchers, three (3) PhD students and seven (7) MSc students.

The position is initially for two years with the possibility of further extension for one more year that will be decided after the first year. The salary will be paid according to the German public service scale.

Applications, including curriculum vitae, list of publications, statement of research interests and experience, and the names (address, e-mail) of three potential referees should be sent to:

Prof. Kostas Kokkotas
Theoretical Astrophysics (IAAT), University of Tübingen, Auf der Morgenstelle 10, D-72076 Tübingen / Germany
http://www.tat.physik.uni-tuebingen.de/~kokkotas
E-mail: kostas.kokkotas_at_uni-tuebingen.de

Further information on the Theoretical Astrophysics Group may be found at https://uni-tuebingen.de/en/6565

Applications by e-mail are welcome. All applications will receive full consideration until the position is filled. The University of Tuebingen seeks to increase the fraction of female scientists in research and teaching and particularly encourages applications from women. Disabled candidates are given preference if equally qualified.
