

NeurCG

Powering the next-generation computer graphics

Student Assistant (business administration) needed for startup

About Us

We are a spinoff from Max Planck Institute for Intelligent Systems, working on next generation computer graphics powered by AI. The team consists of two research scientists from Max Planck with ample experience in 3D facial models and machine learning. Currently, NeurCG is going through Phase 1 of the MAX!mize incubation program, and we are looking for our first pilot customer - for which we need your help!

The Role

We have a new technology to make computer graphics faster and more realistic. Now we need a pilot customer to bring this technology to the market. We have identified a list of potential customers to approach, mainly in the electronic gaming industry. Your role will be to contact them and secure in-person meetings so that we can demonstrate our product.

Skills we are looking for

- Working towards or already with a master in BWL/VWL or similar
- Organized
- Available for a quick discussion, spontaneous
- Independent
