

Revisiting *Spheres of Justice*

“Security” as a social good

Security, Ethics, and Justice (Tübingen, June 22, 2012), Dr. Michael Nagenborg

Part One

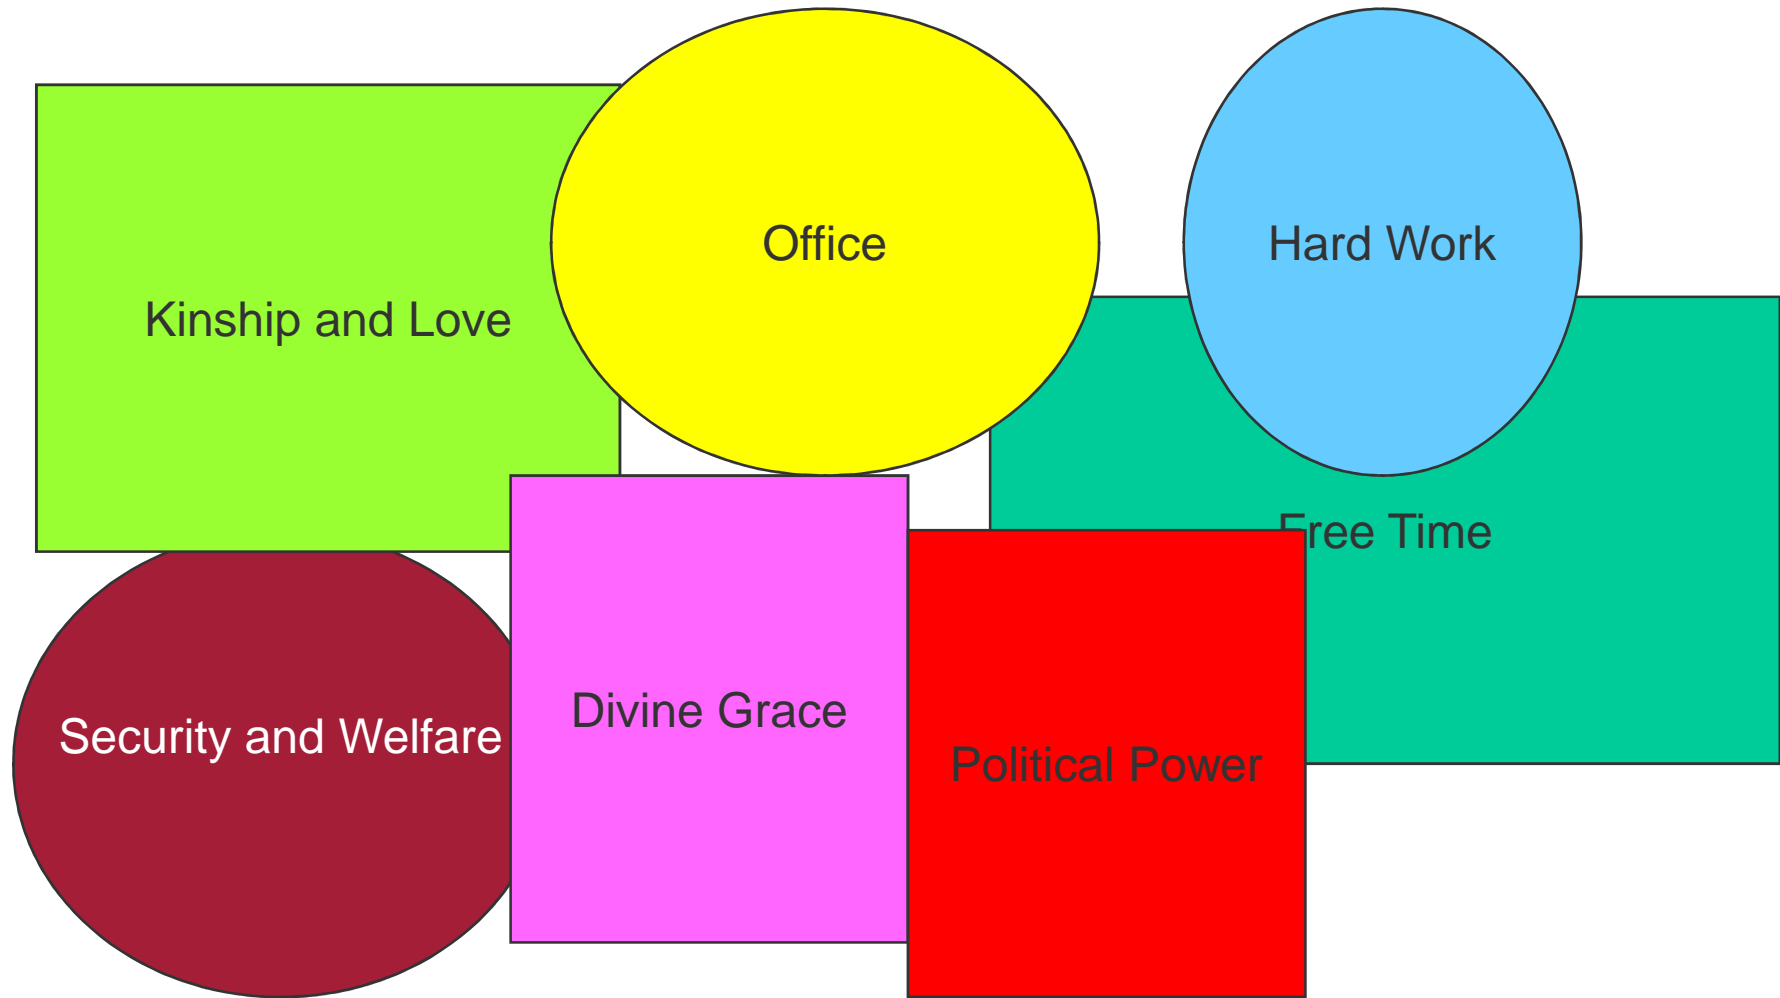

WHY REVISTING *SPHERES OF JUSTICE?*

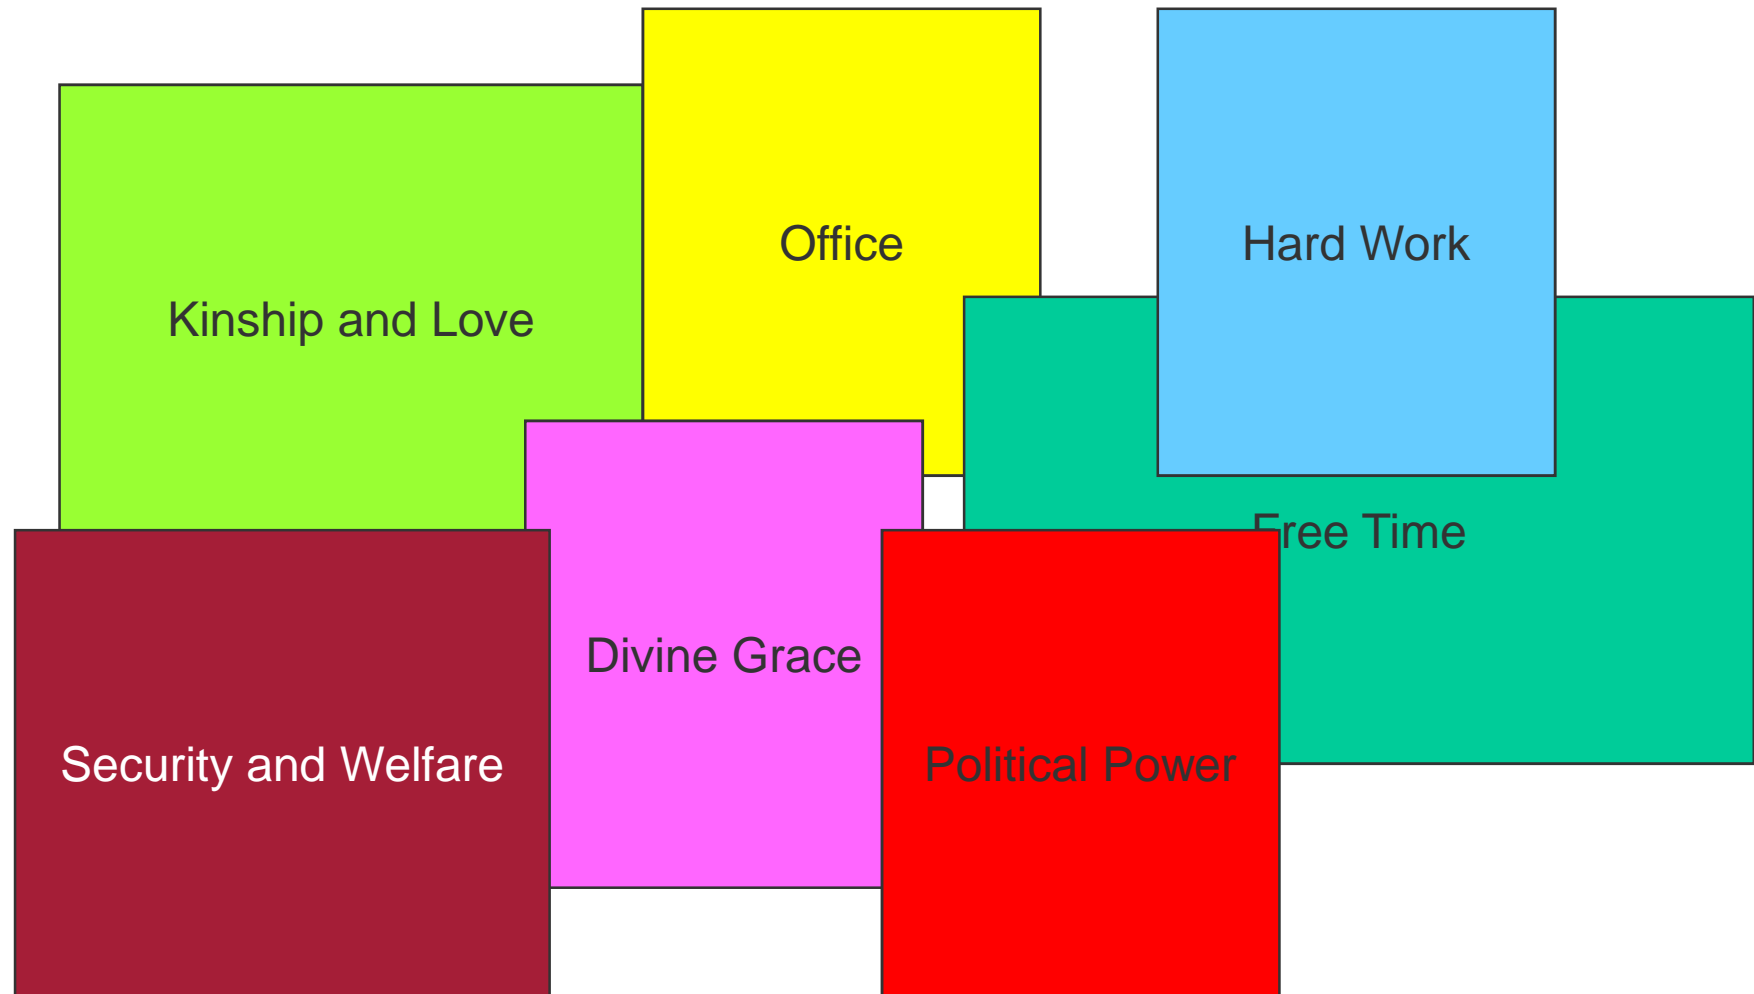

Privacy as contextual integrity

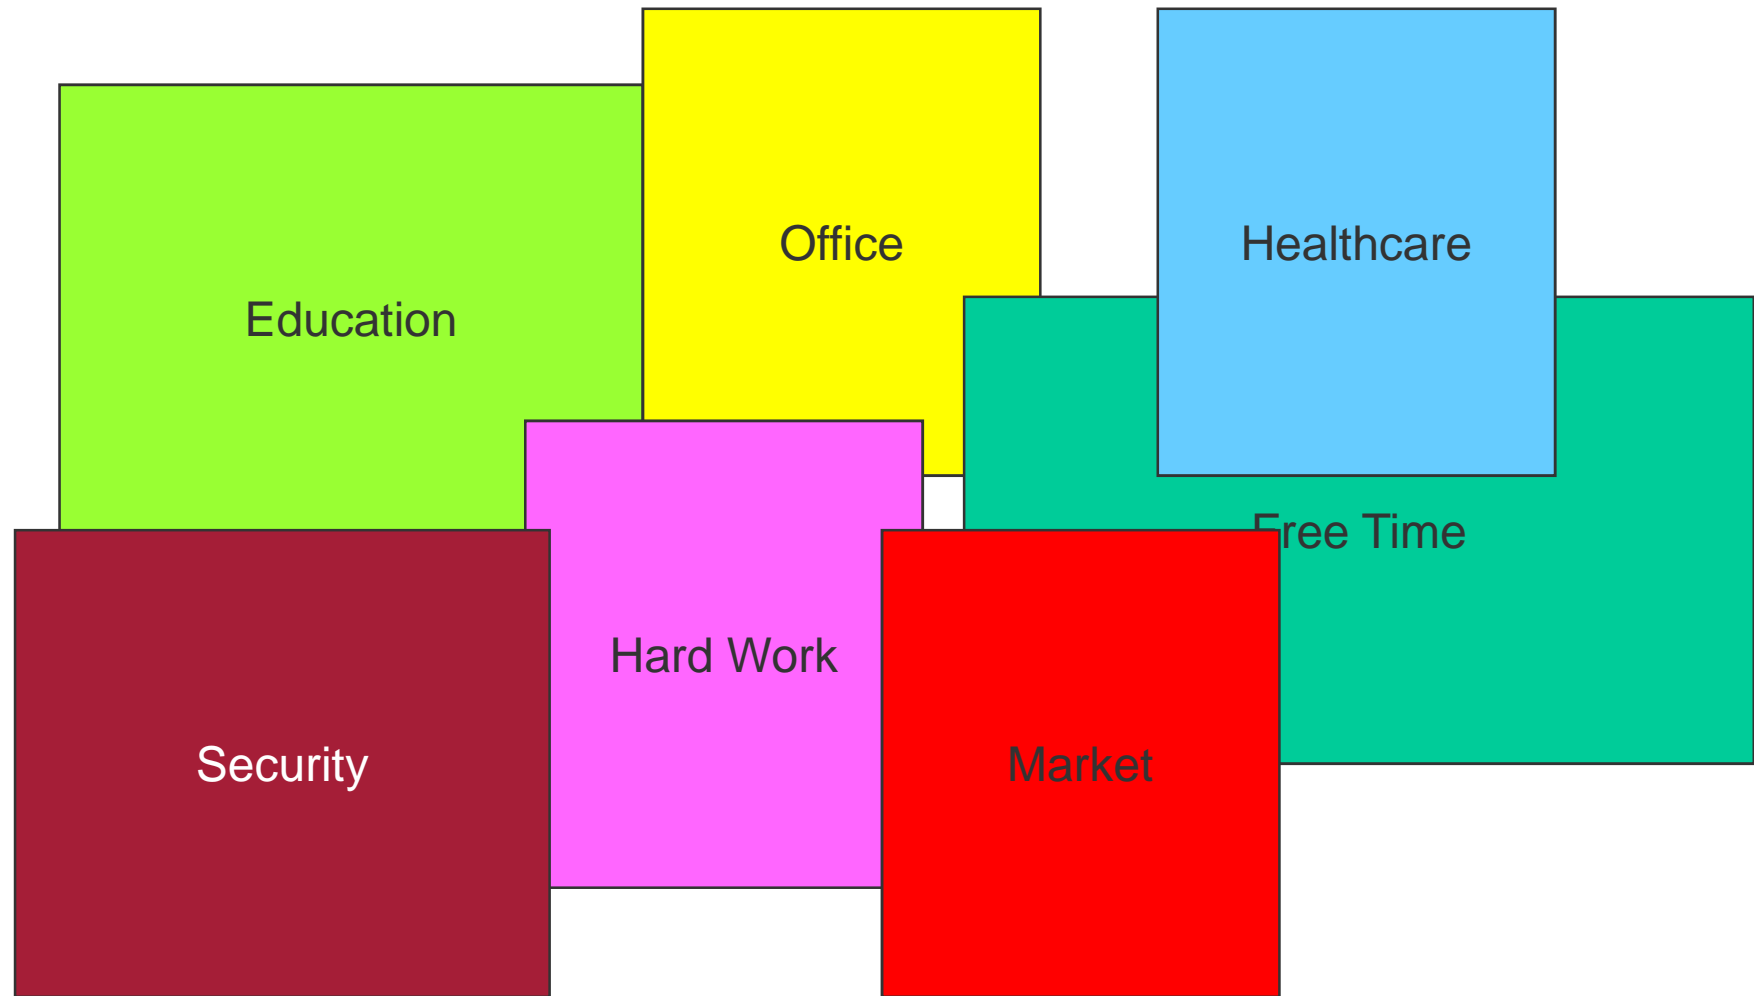

- Nissenbaum (2009)
 - Nissenbaum (2004)
 - Van den Hoven (1999)

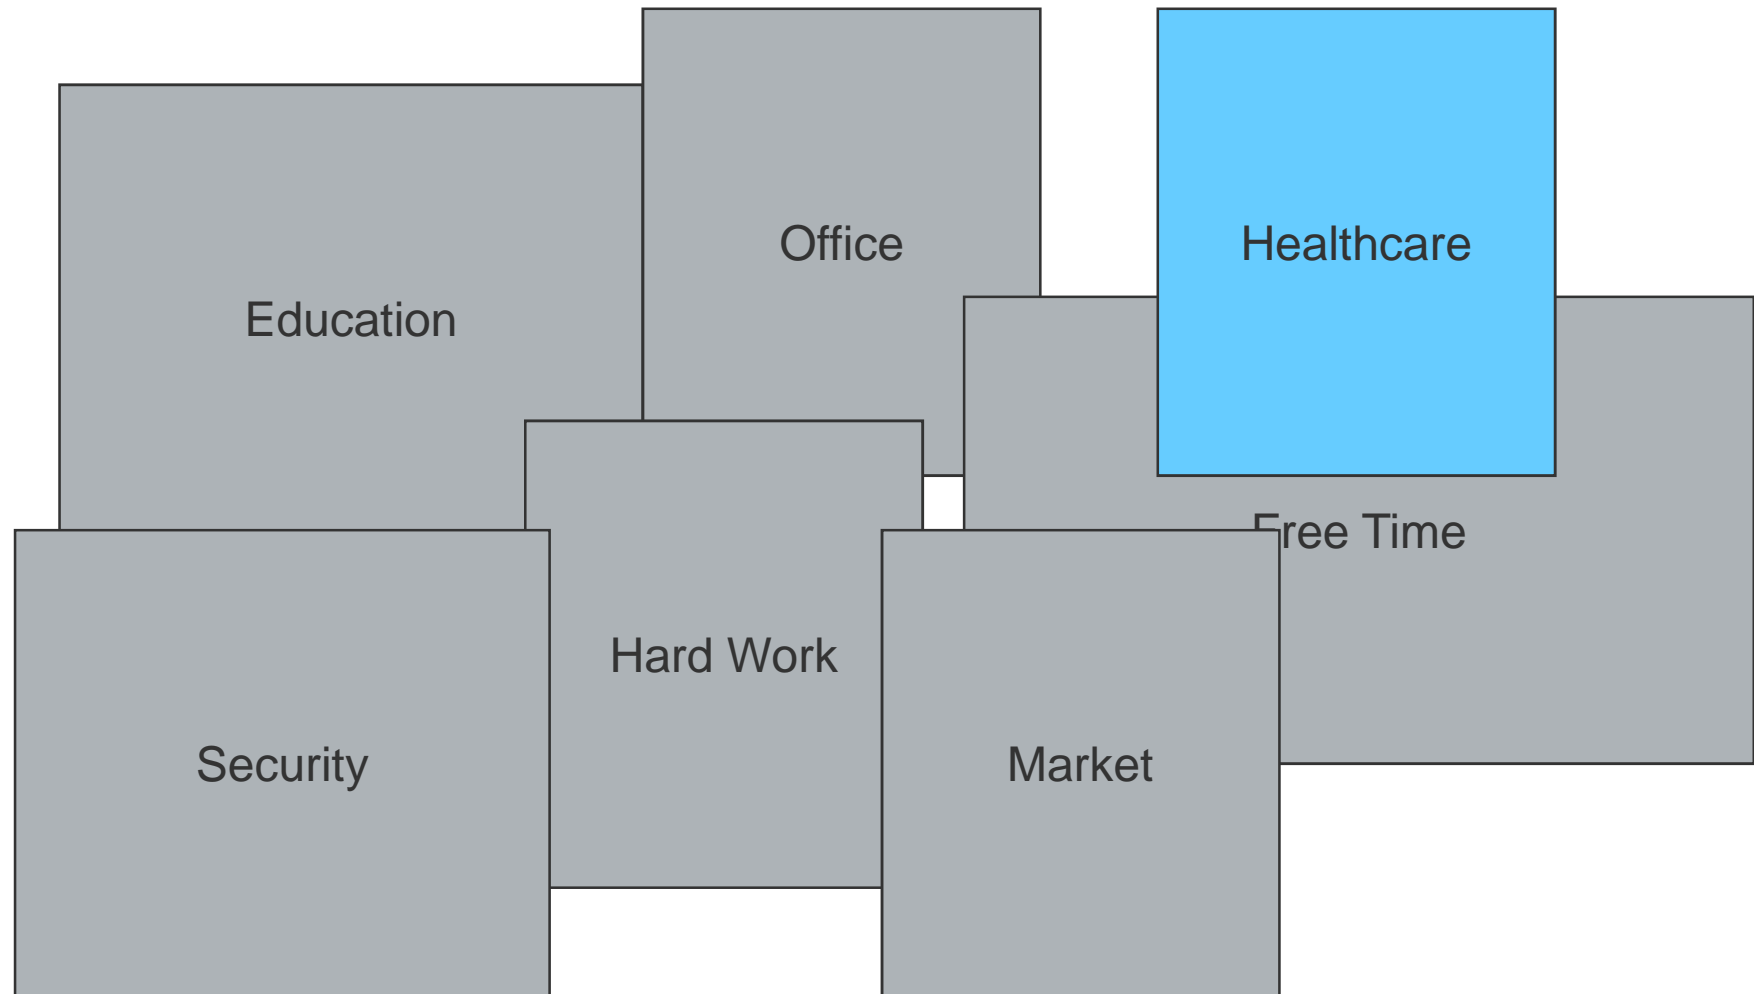

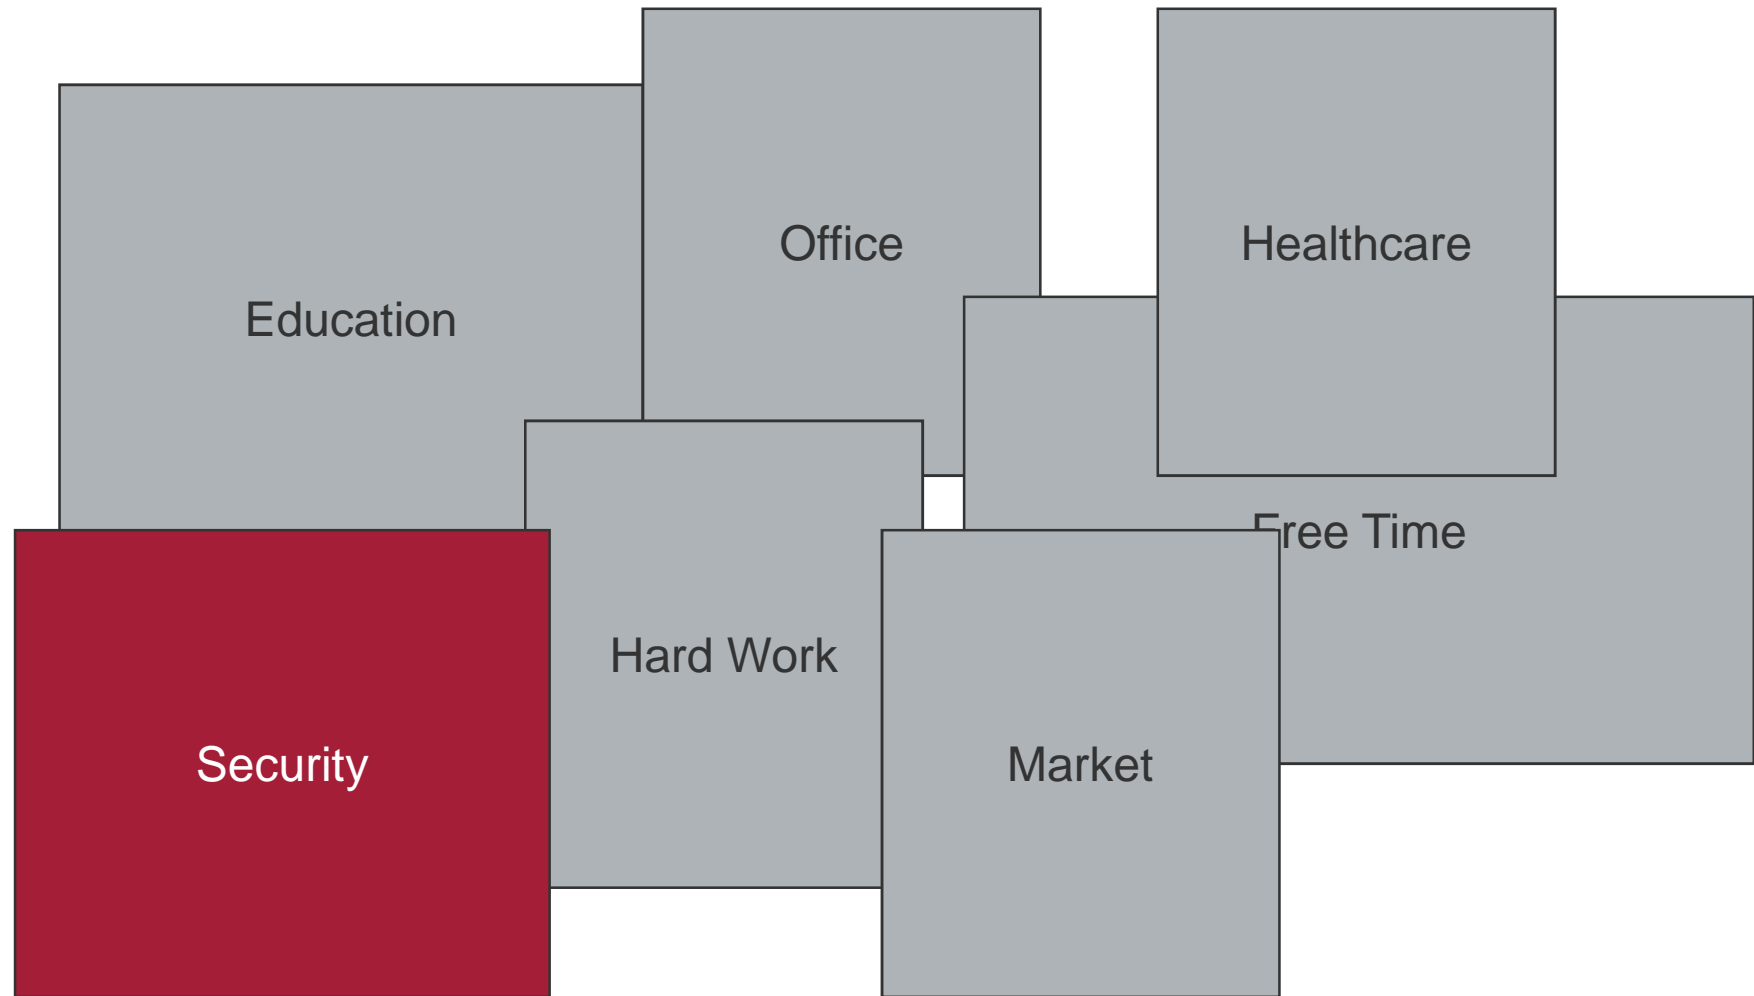

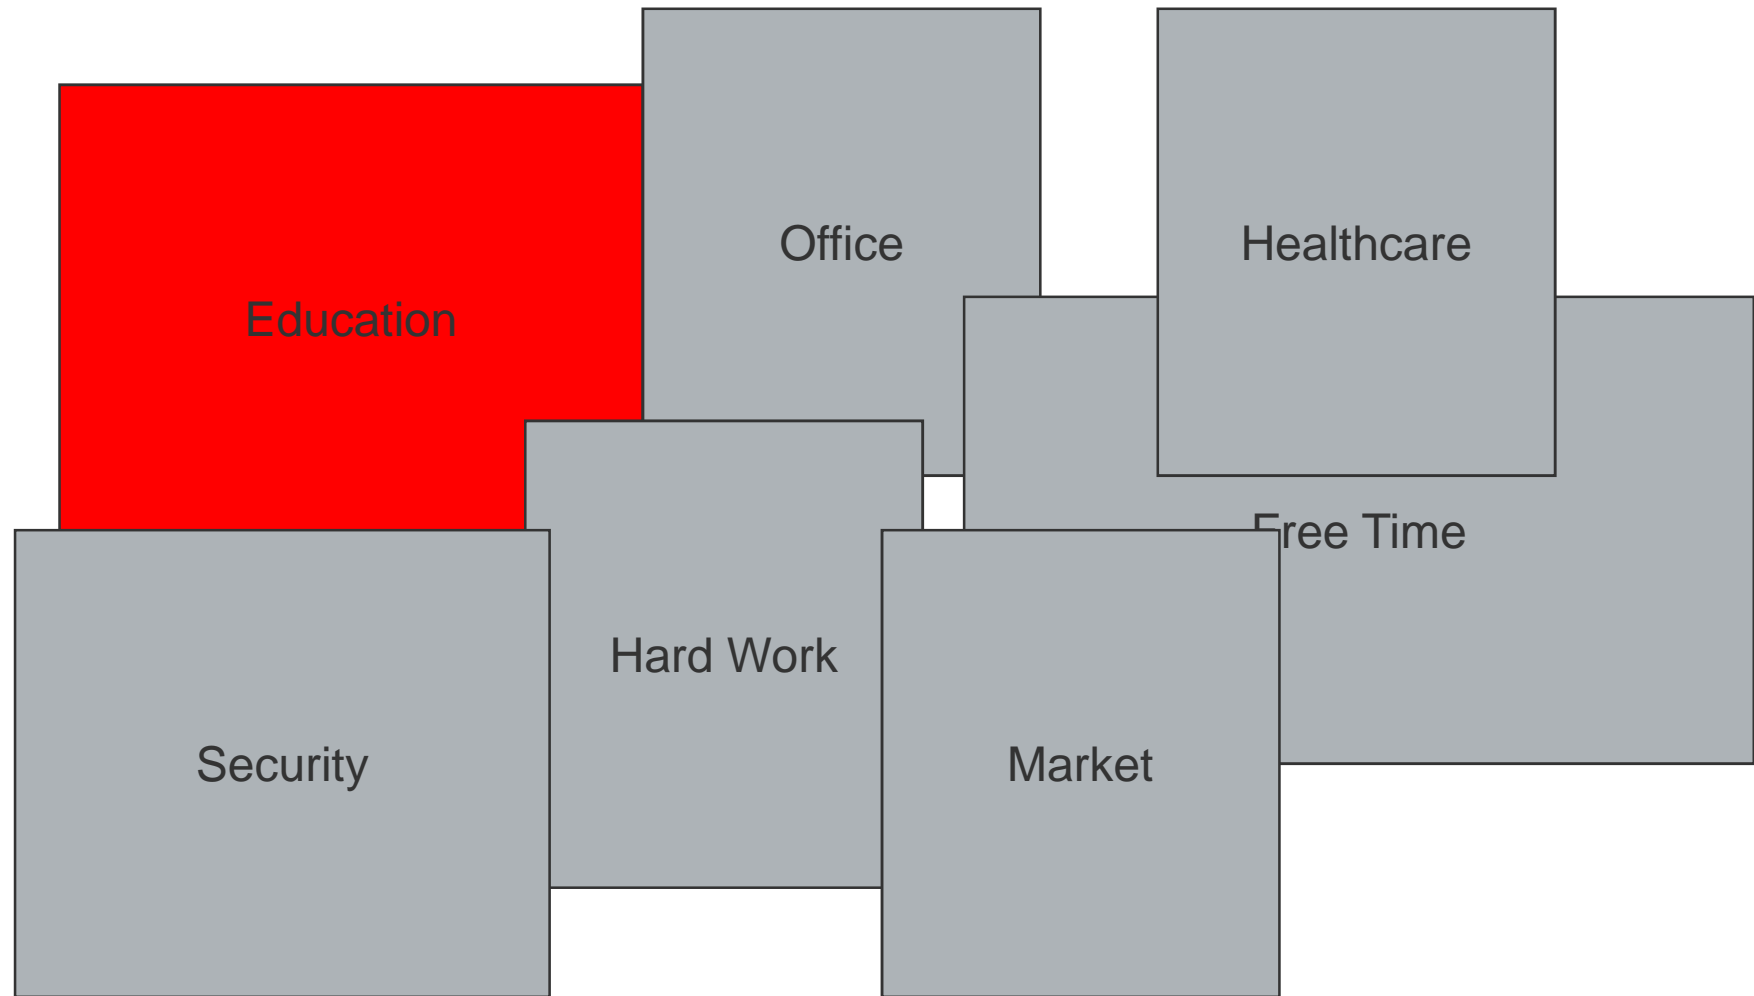

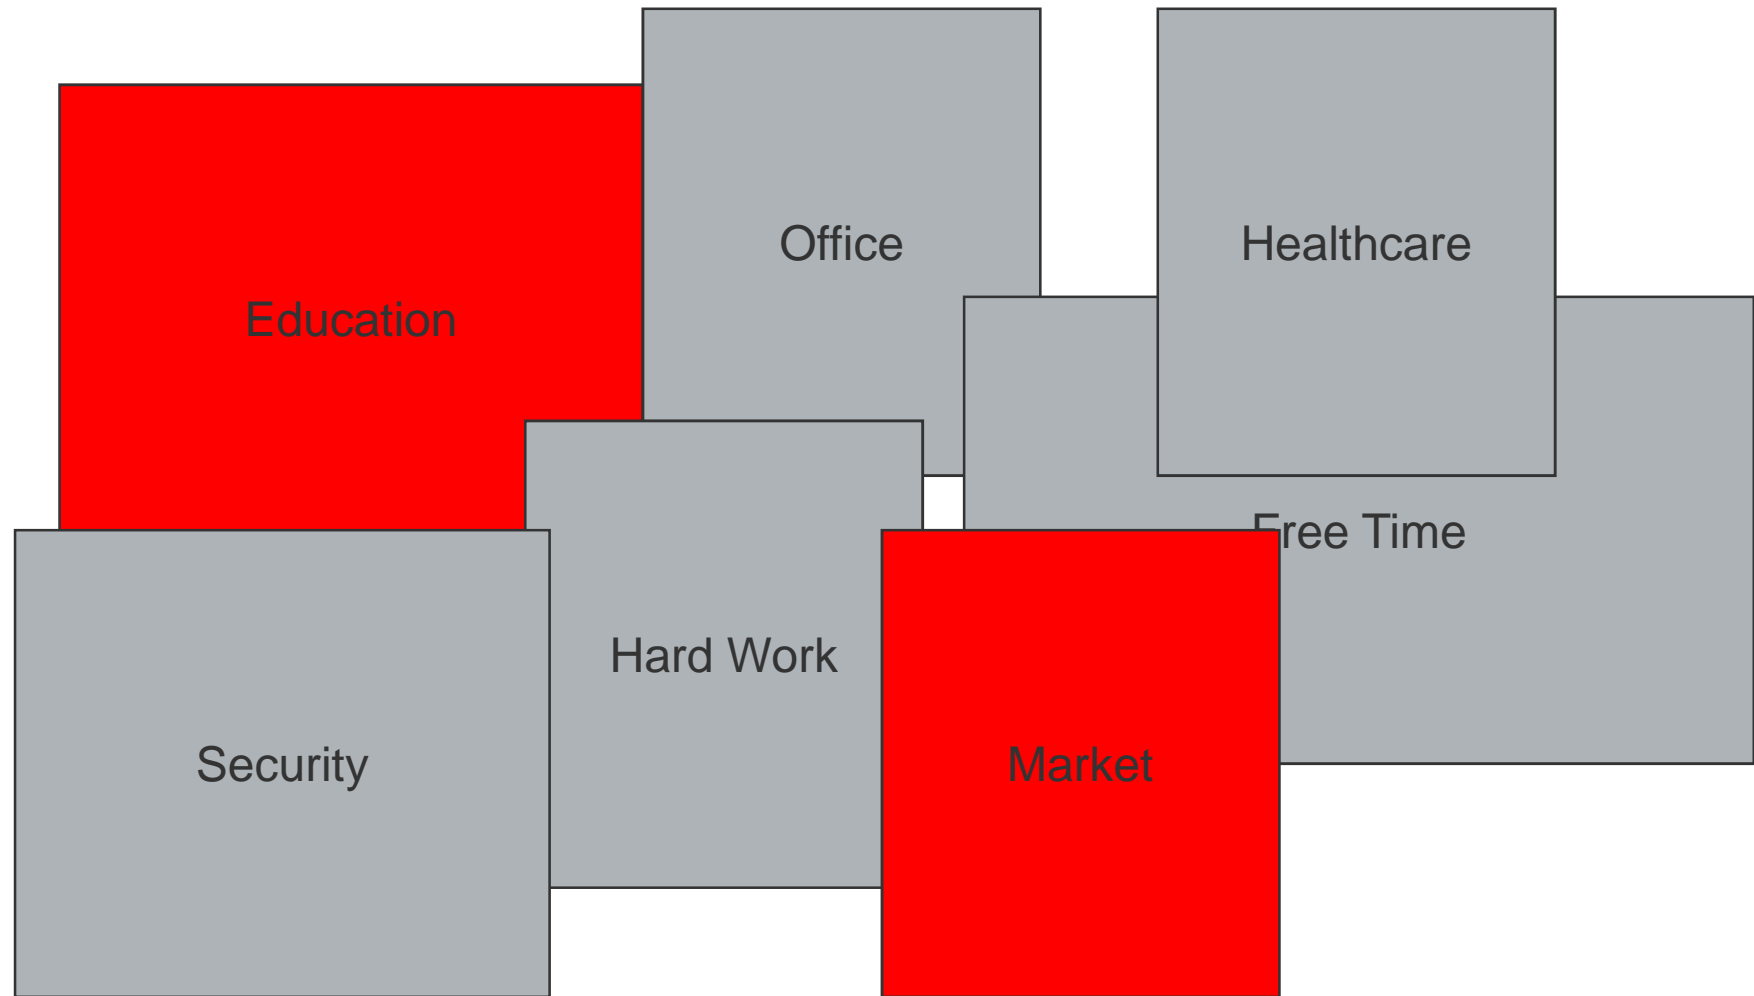

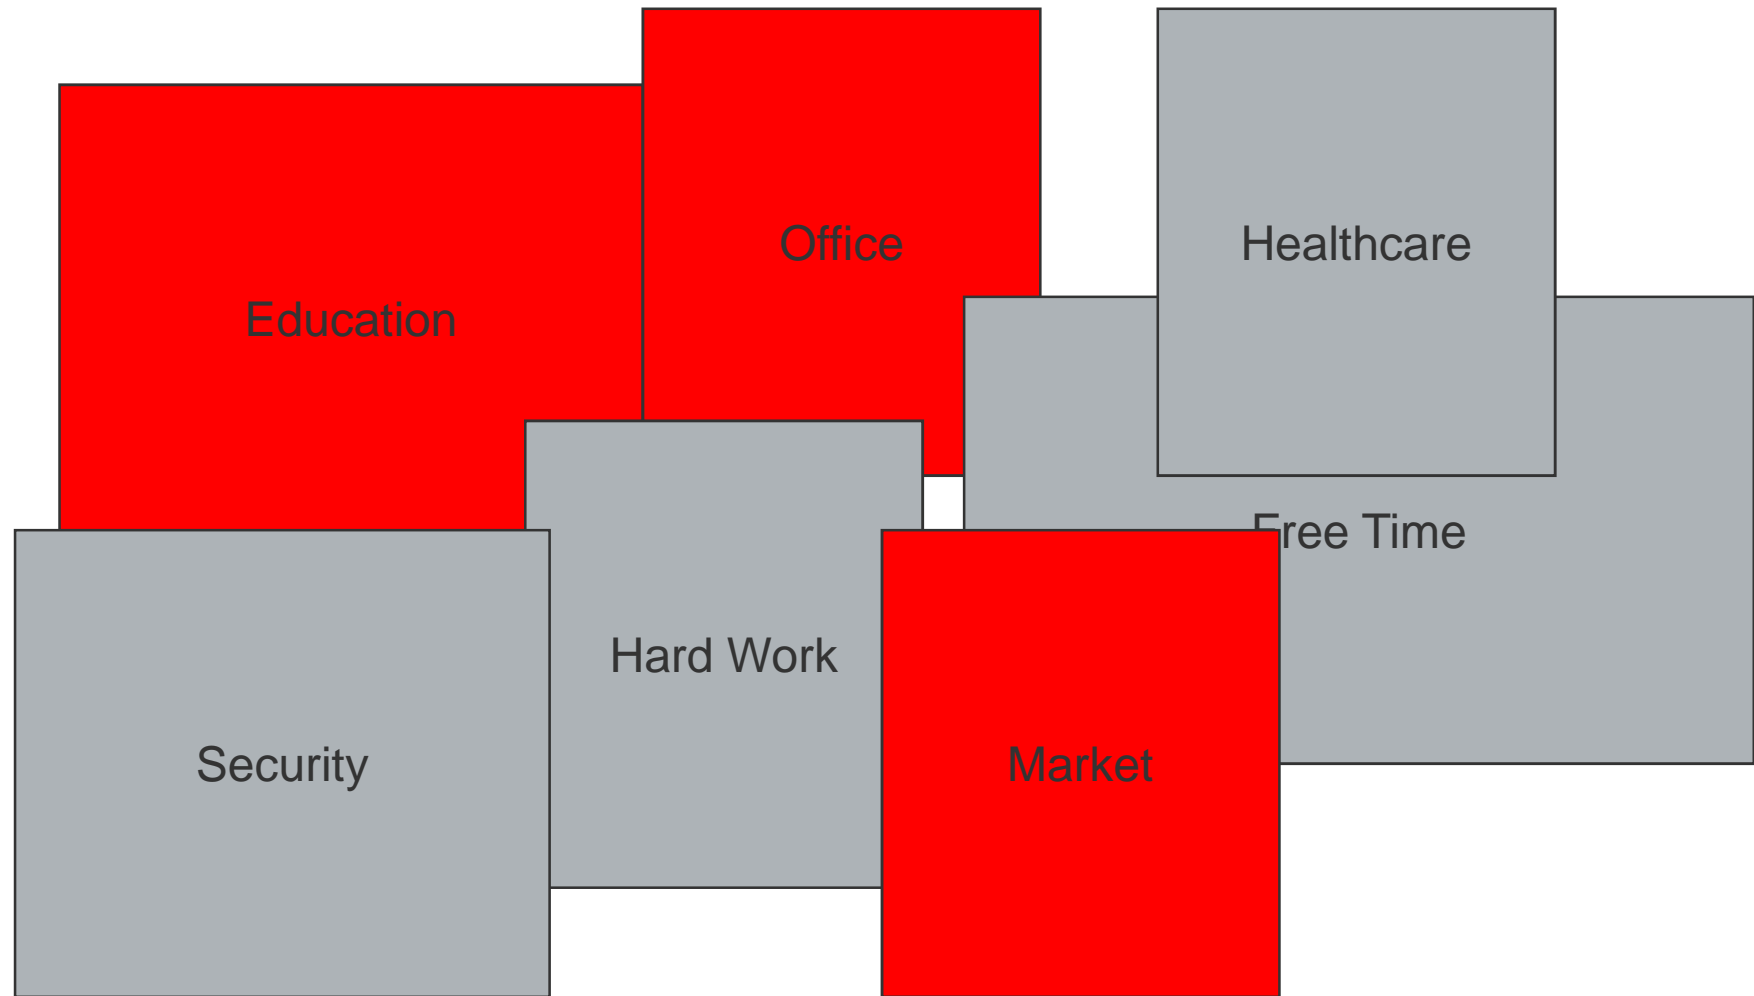

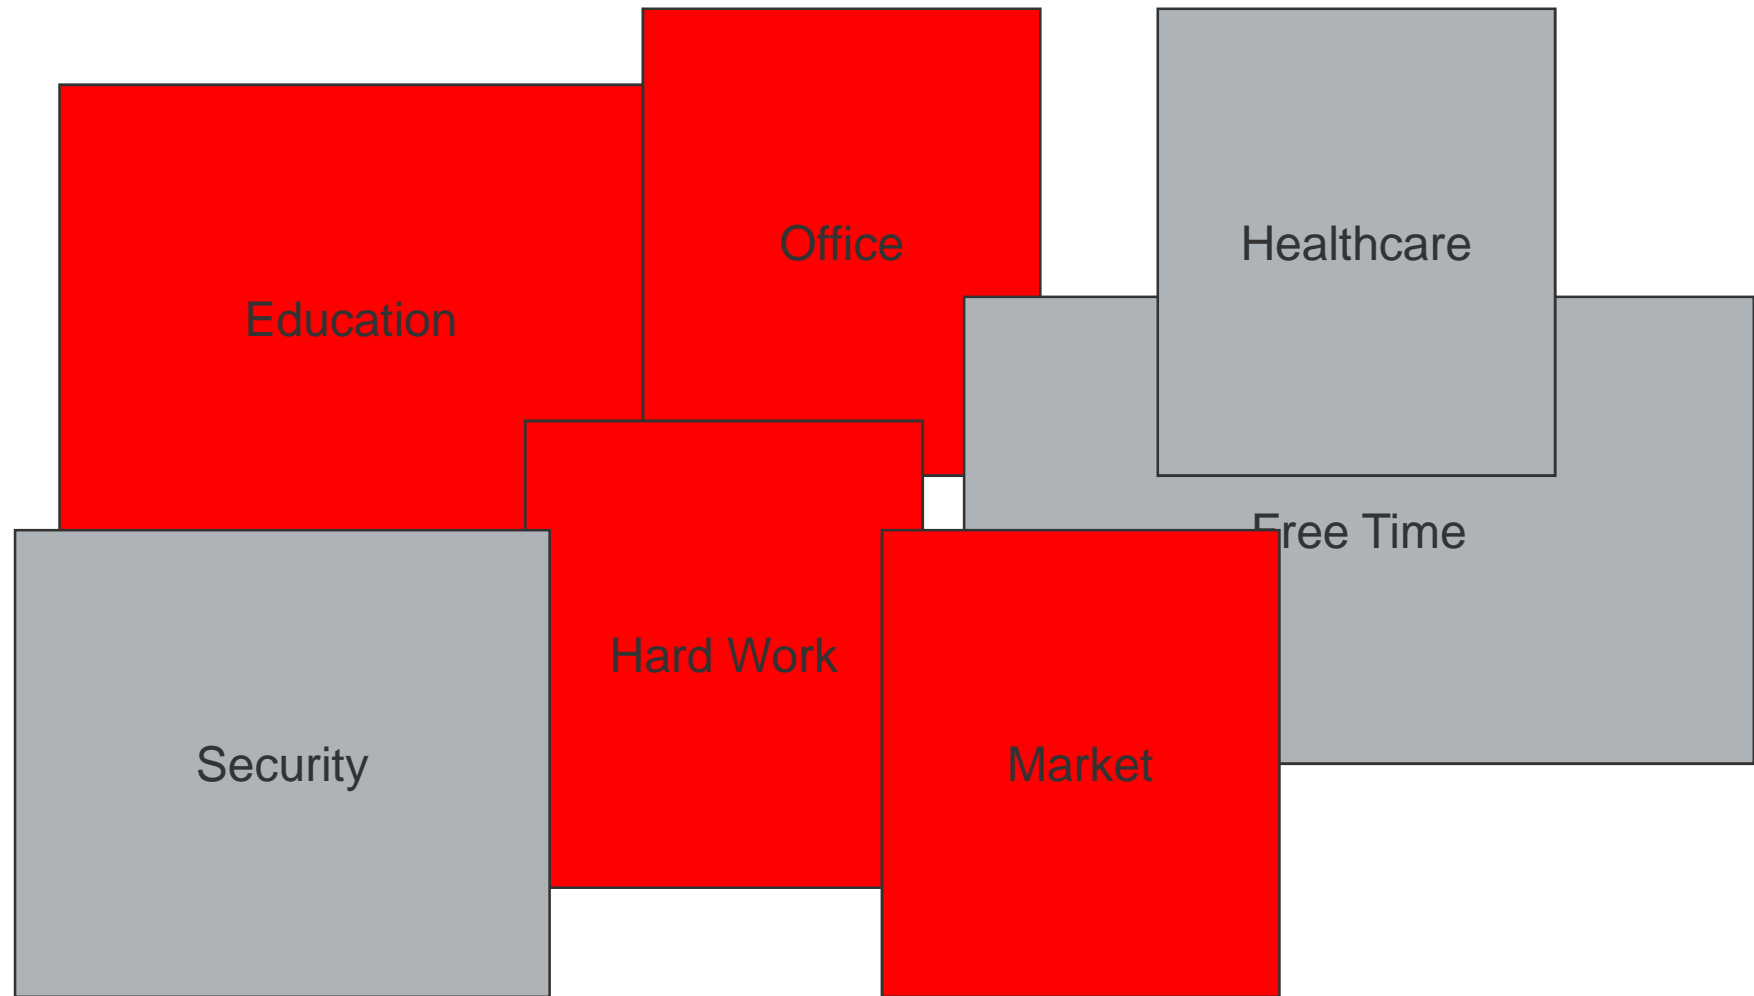

Part Two

REVISITING *SPHERES OF JUSTICE*

Basic ideas (I): social goods

„All the goods with which distributive justice is concerned are social goods.“

(Walzer 1983, p. 7)

Basic ideas (I): social goods

„Goods don't just appear in the hands of distributive agents who do with them as they like or give them out in accordance with some general principle. Rather, goods ... come into people's minds before they come into their hands; distributions are patterned in accordance with shared conceptions of what the goods are and what they are for.“ (Walzer 1983, p. 6-7)

The meaning of „bread“

- „Bread“ as commodity
 - market / free exchange
- „Bread“ as basic food
 - welfare / need
- „Bread“ as „God’s flesh“
 - religion

Basic ideas (I): social goods

- „Goods“ don't have an universal meaning.
- The meaning of a specific good is based on the „shared conceptions“ (Walzer), the way the good is being used and distributed within a given community.

Basic ideas (I): social goods

- „Goods“ don't have an universal meaning.
- The meaning of a specific good is based on the „shared conceptions“ (Walzer), the way the good is being used and **distributed** within a given community.

Basic ideas (II): complex equality

- Walzer (1994, p. 26) „Distributive justice is relative to social meanings.“
- Walzer (1983, p. 10): „When meanings are distinct, distribution must be autonomous. Every social good or set of goods constitute ... a distributive sphere within which only certain criteria and arrangements are appropriate.“

Basic ideas (II): complex equality

- Walzer (1983, p. 20): „No social good x should be distributed to men and women who possess some other good y merely because they possess y and without regard to the meaning of x .“
- Also: No social good x should **not** be distributed to men and women who **don't** possess some other good y merely because they **don't** possess y and without regard to the meaning of x .
 - „Cumulative disadvantages“
- Walzer (1983, p. 146): „We don't rule out men and women with red hair or bad taste in movies or a passion for ice-skating.“

Scope and limitations

- Miller (2007, xii): „Walzer’s liberalism has little to say about rights, an idea that features so prominently in many rival versions.“
- „Spheres of Justice“ as a theory of injustice (Shklar 1992)
- While the idea of autonomous spheres of distribution does provide us with a criteria to recognize injustice, the analysis of the interplay between different spheres is not part of Walzer’s theory of (in)justice.

Part Three

SECURITY AS A SOCIAL GOOD

Distribution according to need

- „Security“ and „welfare“ are to be distributed according to the principle of need: „From each according to his ability (or resources); to each according to his social recognized needs.“ (Walzer 1983, p. 91)
- Distribution based on „social recognized needs“ should not affect the distribution of other social goods.

„Security“, „need“, and politics

„We could provide absolute security, eliminate every source of violence except domestic violence, if we put a street light and stationed a policeman every ten yards throughout the city. But that would be very expensive, and so we settle for something less. *How much less can only be decided politically.*“ (Walzer 1983, p. 67)

„Security“, „need“, and politics

„We could provide absolute security, eliminate every source of violence except domestic violence, if we put a street light and stationed a policeman every ten yards throughout the city. But that would be very expensive, and so we settle for something less. *How much less can only be decided politically.*“ (Walzer 1983, p. 67)

„Security“, „need“, and politics

„We could provide absolute security, eliminate every source of violence except domestic violence, if we put a street light and stationed a policeman every ten yards throughout the city. But that would be very expensive, and so we settle for something less. *How much less can only be decided politically.*“ (Walzer 1983, p. 67)

„Security“, „need“, and politics

- Walzer (1983): „Any philosophical effort to stipulate in detail the rights or the entitlement of individuals would radically constrain the scope of democratic decision making.“ (Cf. Walzer 1981)
- Conflict between (inter-)national security regulations and local understanding of the need for security.
 - Walzer (1983): „... security is provided because the citizens need it. And because, at some level, they all need it, the criterion of need remains a critical standard“

The changing meaning of „security“

- Reminder: The way a social good is being distributed shapes it's meaning.
- How does the use of body scanners change the meaning of „security“?
 - What does „security provided by body scanners“ mean to people, that might become visible and potentially marked as, e.g., persons with hidden disabilities?
 - Will they have a word in the political decision making process about the way „security“ is being provided?

Final Part

SUMMARY AND OUTLOOK

Summary and Outlook

- *Security as social good* is at least a useful metaphor.
 - What is the underlying principle for the distribution of security?
 - What is the meaning of security today?
- But we should be aware of the scope and the limitations of such an approach.
 - Theory of injustice, that says little about the interplay between different spheres.
- Outlook
 - Dirty work: Security personell
 - Punishment: Preventive Detention

Thank you for your attention!
