

GRK 2381

cGMP: From Bedside to Bench

GRK 2381 Science Forum

Online Seminars (due to corona-related restrictions, until further notice)

Schedule December 2020 to July 2021

Date	Topic	Speaker	Hosted by
December 7, 2020 12:15 pm	Laser scanning microscopy in cardiovascular research	Dr. Remco Megens Imaging and Biophysics Shared Resource Lab, Ludwig-Maximilians-Universität München	Project 1
February 3, 2021 5:15 pm	Novel insights on molecular and cellular determinants of arterial stiffness	Francesca Seta, PhD Vascular Biology Section, Boston University School of Medicine	Project 3
March 3, 2021 5:15 pm	Development of sGC stimulators and activators	Prof. Emmanuel Buys Cyclerion Therapeutics, Cambridge, MA	Project 6
April 14, 2021 5:15 pm	Targeting cGMP in CNS drug discovery: A translational approach into cognition enhancement	Prof. Jos Prickaerts School for Mental Health and Neuroscience, Maastricht University	Project 9
May 5, 2021 5:15 pm	Insulin like growth factor I acts as a cytokine with cardio-protective potential	Prof. Axel Gödecke Institute of Cardiovascular Physiology, Heinrich Heine University Düsseldorf	Project 5
June 9, 2021 5:15 pm	Cav-independent functions of the Cav β 3 subunit	Prof. Veit Flockerzi Center for Molecular Signaling (PZMS), Saarland University	Project 4
July 7, 2021 5:15 pm	TBA	Prof. Claudia Lengerke Internal Medicine II, University Clinics Tübingen	Project 2
