

Obseminar Geometrische Analysis, Differentialgeometrie und Relativitätstheorie

Am **Donnerstag**, den **04.07.2024** spricht um **14 Uhr s. t.** im Raum **S9** (C6H05) und über Zoom

Prof. Dr. Simon Brendle
(Columbia University)

über das Thema

Systolic inequalities and the Horowitz-Myers conjecture

Let $3 \leq n \leq 7$, and let g be a Riemannian metric on $B^2 \times T^{n-2}$ with scalar curvature at least $-n(n-1)$. I will discuss an inequality that relates the systole of the boundary to the infimum of the mean curvature on the boundary. This inequality implies a conjecture of Horowitz and Myers. This is joint work with Pei-Ken Hung.
