## Minisymposium “Cell Signaling”

January 11 and 17, 2023

IFIB Lecture Hall Level 2 (2T26)

### Wednesday, January 11, 2023

- |       |   |   |
|-------|---|---|
| 12:00 | Dr. Paolo Armando Gagliardi<br>Institute of Cell Biology, University of<br>Bern, Switzerland                            | Exploring single-cell and collective<br>signaling dynamics with fluorescent<br>biosensors |
| 12:40 | Dr. Marisa M. Merino<br>Biochemistry Department, University of<br>Geneva, Switzerland                                   | Breaking down growth during<br>tumorigenesis  |
| 13:20 | Dr. Arend Vogt<br>Institute for Neurology and Experimental<br>Neurology, Charité Universitätsmedizin<br>Berlin, Germany | Optogenetic modulation of signaling<br>pathways   |

### Tuesday, January 17, 2023

- |       |   |   |
|-------|---|---|
| 10:00 | Dr. Nisha Mohd Rafiq<br>Department of Cell Biology, Department<br>of Neuroscience, Yale University, USA | Integrating cellular mechanics and signaling<br>pathways in neurodegeneration |
|-------|---|---|
