

International Network for Research and Development of Confirmation and Christian Youth Work

We hereby agree to form an International Network for Research on Confirmation and Christian Youth Work. The sole purpose of this network consists of the joint effort to support, and to carry out, research in this field that has not received the attention it deserves.

The founders of the network agree that their research initiatives will contribute in significant ways to the future of Christianity in their respective countries as well as to the development of civil society in general.

The underwriters agree that membership in the network presupposes the willingness to work towards fulfilling the purpose mentioned above. At present, there are no additional obligations for the membership. If a need for such obligations should arise in the future, they can only be introduced by mutual consent.

The network shall be open to whoever is willing and able to work towards the goals of the network. New members will be included in the network upon majority approval of its members.

Tübingen, July 16, 2007
