address

I hereby certify that the (course) work with the title:

_____

in the course   _____

in summer-/winterterm_____at_____

was written independently and only with the aids specified in the work.

I am aware that I have to independently write all written work that I submit as coursework or examinations during my studies. Quotations and the use of external sources and aids must be clearly marked by me in accordance with the rules of scientific documentation. I am not allowed to pass off third-party texts or text passages (including those from the Internet) as my own (see also AI-supported tools below). My work has not been the subject of any other examination procedure, either in whole or in essential parts. I have not yet published the work in full or in significant parts. The copy submitted in file form matches the bound copies submitted.

If I violate these basic rules of scientific work, this is considered an attempt to deceive or cheat and will result in corresponding consequences. In the minimum case, the performance is rated as "insufficient" (5.0). In serious cases, the examination board can also exclude the person concerned from taking further examinations.

Addition to the use of AI-supported tools:
One of the two options must be selected in consultation between the examiner and the examinee.
☐ **option 1: no use of generative AI**

I certify that I wrote this work entirely independently and did not use any AI-supported tools.

☐ **option 2: permitted use of AI-supported tools with mandatory labeling**
I am aware that the use of AI-supported tools and texts or content created with them does not guarantee their quality and I bear responsibility if the use of such tools results in incorrect content, violations of data protection law, copyright or scientific Misconduct (e.g. plagiarism) occurs.
I also certify that if I use AI-supported tools:
- I only used this as an aid and my creative influence predominates in this work;
- state which AI-supported tools I used, for what purposes and to what extent. If I use AI-supported tools, I have attached an appendix to the work in which I have described and reflected on my use of AI-supported tools on a maximum of one page.
