

Sommerkonferenz

Graduiertenkolleg Islamische Theologie

Islamic Theology – Past, Present and Future

Global Challenges and Prospective Synergies in
the Academic Study of Islam

23.-24. Juli 2016,
Zentrum für Islamische Theologie (ZITh)
Universität Tübingen

The academic study of Islam is currently faced with the changing configuration of its hermeneutical and institutional outlook. Islam as an object of study is affected by the anthropological turn of the human sciences in a way that shifts the focus from the philological study of religious literature to the cultural and sociological study of Muslim societies. At the same time, the establishment of a confessionally bound Islamic theology in Germany introduces a new approach to the academic study of Islam which raises the question how Islam constitutes a subject of scientific activity. This complex situation constitutes new challenges for the academic community, but at the same time it creates new synergies which open interdisciplinary possibilities and the prospect of studying Islam in its multidimensionality. Within this scope, this international and interdisciplinary conference aims at presenting various fields of interaction between "Islamwissenschaft" (Oriental and Islamic studies) and "Islamische Theologie" (Islamic theology) according to the thematic focus of the Center for Islamic Theology in Tübingen.

With contributions by Catherine Mayeur-Jaouen (Paris), Stefan Reichmuth (Bochum), Mathias Rohe (Erlangen), Ulrich Rudolph (Zurich), Walid Saleh (Toronto), Sohaira Siddiqui (Georgetown/Qatar), Brannon M. Wheeler (US Naval), Timothy Winter (Cambridge) and many others...

Tagungsort:

Universität Tübingen, Alte Aula, Münzgasse 30, 72070 Tübingen.

Eine Anmeldung wird erbeten unter: sommerakademie@zith.uni-tuebingen.de.

Die Teilnahme ist kostenlos.
