

“Recent Developments in Pricing” (B321D)

I. Type of seminar

Students are familiar with the effects different pricing strategies can have on firm sales, revenue, and profit. Students will be able to use recent academic developments to solve pricing management problems. Students will know how to present their pricing approaches and problem solutions to an audience.

II. Topics and introductory reading material

The seminar will cover four pricing topics: reference prices, customer preferences, price promotions, and revenue management. Students will acquire theoretical knowledge on these topics and are asked to discuss them critically in a specific corporate setting. Besides acquiring pricing knowledge, emphasis is placed on critical assessment of a managerial situation. Moreover, students learn how to develop and present their findings effectively.
