

Forschungsseminar AG Geoökologie (GEO 95)
Dienstag, 12.15-13.45 Uhr
W400 (Westbau Geographie)

Department of Geosciences
Geocology
Stand: 26.09.2024

- 05.11.24 **Debanjan Ghosh (PhD):** Does the carbon isotope ratio of bulk organic matter and chemically separated charcoal faithfully represent the ambient vegetation?
- 03.12.24 **Emilia Lagos Kalhoff (BSc Uni Osnabrück):** Assessing soil microbial biomass and nutrient use efficiency using stable isotope techniques
- 10.12.24 **Harald Neidhardt (Postdoc):** Generative AI – a new reality in teaching and research?
- 14.01.14 **Pauline Röhner (MSc):** Migration pattern of the dragonfly *Aeshna mixta* along the Baltic Sea Coast
- 21.01.24 **Haikuo Zhang (PhD):** Effects of tree diversity on soil microbial nutrients use efficiency in subtropical forests
- Jens Grammer (PhD):** Phosphorus Dynamics in Caves - Bridging Ecology and Archaeology
- 28.01.25 **Integratives Projekt Offenhaltungsversuche:** Abschlusspräsentation
- 04.02.24 **Camilo Maliqueo Murga (PhD):** Exploring the impact of plant species richness in grassland on the microbial phosphorus cycle in soil through isotopic labelling approach in the Jena Experiment

Images created by the presenters using DallE, Ideogram.ai and canva
