

AEG year when you started AEG

CHENG Lirong

I'm living in Beijing, China

My occupation

I worked at a consulting company for one year before I took a teaching position at the College of Water Sciences, Beijing Normal University. I teach and do research in contaminant hydrogeology.

My AEG time

I feel very lucky being a member of the first AEG group (1999-2001). There are lots of memories of my time in Tuebingen: busy classes, group projects, homework, weekend parties, field trips... ... With the knowledge from the course I was able to pursue my PhD after the course and start my career as a teaching staff at Beijing Normal University. I benefit from the modelling, geochemistry, geophysics, comprehensive exercise, field trips and of thesis writing.
