

Symposium
„Machine Learning in Science“

May 22, 2019

Max-Planck-Gästehaus

Lecture Hall

Max-Planck-Ring 6, 72076 Tübingen

09:45	<i>Tropical circulation: Current challenges and potential for machine learning algorithms</i> Bedartha Goswami Potsdam-Institut für Klimafolgenforschung (PIK), Deutschland
10:30	<i>High-throughput behavioral analysis for neural circuit understanding</i> Alexander Mathis Dept. of Molecular and Cellular Biology, Harvard University, USA
11:15	<i>Coffee Break</i>
11:30	<i>Reverse Engineering the Early Visual System with Artificial Neural Networks</i> Stéphane Deny Department of Applied Physics at Stanford University, USA
12:15	<i>Visualization of georeferenced open government data: benefits, issues, opportunities for machine learning research</i> Auriol Degbelo Institute of Geography, University of Osnabrück, Deutschland
