

## Scope

*Biblische Zeitschrift (BZ)* founded in 1903, is one of the leading international journals in Biblical Studies. Contributions are published in German, English and French. The primary aim of the journal is to further the understanding of the Biblical texts, both of the Old and the New Testament. Articles focus on philological or text-critical issues, raise questions of historical and cultural contextualisation or concentrate on literary, hermeneutical or theological issues – to name only a few of the relevant aspects. Each volume also contains book reviews to help scholars as well as everyone interested in Biblical Studies to keep informed in the ever-developing field of study.

## Ethical and Legal Conditions

The publication of a manuscript in a peer-reviewed work is expected to follow standards of ethical behavior for all parties involved in the act of publishing: authors, editors, and reviewers. Authors, editors, and reviewers should thoroughly acquaint themselves with Brill's publication ethics, which may be downloaded here: [brill.com/page/ethics/publication-ethics-cope-compliance](http://brill.com/page/ethics/publication-ethics-cope-compliance).

## Publication

### *Proofs*

Upon acceptance, a PDF of the article proofs will be sent to authors by e-mail to check carefully for factual and typographic errors. Authors are responsible for checking these proofs and are strongly urged to make use of the Comment & Markup toolbar to note their corrections directly on the proofs. At this stage in the production process, only minor corrections are allowed. Alterations to the original manuscript at this stage will result in considerable delay in publication and, therefore, are not accepted unless charged to the author. Proofs should be returned promptly to the editors.

### *E-Offprints*

A PDF file of the article will be supplied free of charge by the publisher to each author. Brill is a RoMEO yellow publisher.

Authors are allowed to post their submitted (pre-peer-review) version of the article at any time. This is the author's own version that had not yet been peer-reviewed, or had any value added to it by Brill (such as formatting or copy editing). Authors may post the accepted (peer-reviewed) version of their article 12 months after publication. This is the version accepted for publication, which contains all revisions made after peer review and copy editing, but has not yet been typeset in the publisher's lay-out. The publisher's lay-out must not be used in any repository or on any website.

## Consent to Publish

### *Transfer of Copyright*

By submitting a manuscript, the author agrees that the copyright for the article is transferred to the publisher if and when the article is accepted for publication. For that purpose, the author needs to sign the **Consent to Publish** which will be sent with the first proofs of the manuscript.

### *Open Access*

Should the author wish to publish the article in **Open Access** he/she can choose the **Brill Open** option. This allows for non-exclusive Open Access publication under a Creative Commons license in exchange for an Article Publication Charge (APC), upon signing a special **Brill Open Consent to Publish** Form. More information on Brill Open can be found on [brill.com/brillopen](http://brill.com/brillopen).
