

Struggle for Love

1. Verse

Why do we love, why do we fight?
Where is life leading us?
What drives life forward? What's it all
for?
For life or a one night stand?
To be a warrior or a diplomat?
How will you manage, primate?

1. Chorus

It's Evolution!
You might have thought
That it's power
By which it rates us,
But it measures all the creatures
Only by the children of their children
Evolution!

2. Verse

How did it all begin?
The molecule ballet?
Will we be forebears, bones in stone?
Ever since the soup it worked.
Now enjoy your dessert
Get what you can, then kick the
bucket!

2. Chorus

It's Evolution!
You must have sensed
That it's love
By which it rates:
For it measures all the creatures
Only by the children of their children
Evolution!

3. Verse

It's love that makes us fit.
Scores don't count in this game
To pass on life is the great ambition
Your youngsters look like you
Your genes makes them strong
All too soon, your final chapter starts

3. Chorus

It's Evolution!
It's clear
That it's love
By which it rates:
For it measures all the creatures

Only by the children of their children
Evolution!

4. Chorus

It's Evolution
It is clear
That it's love
By which it rates:
For it measures all the creatures
Only by the children of their children
Evolution!

Off to bed.
