

**Oberseminar
Geometrische Analysis, Differentialgeometrie und Relativitätstheorie**

Donnerstag, 20. Juli 2023 im Raum **S9 (C06H05)** und über Zoom

14:15 – 15:15 Uhr Vortrag

Gerhard Huisken
(Universität Tübingen)

Concepts of quasi-local mass and quasi-local size

Abstract:

We explore different notions of quasi-local mass and their relation to a conjecture of Kip Thorne.

15:15 -15:45 Uhr Kaffee und Tee im Hankelzimmer

15.50 - 16.50 Uhr Vortrag

Simon Brendle
(Columbia University)

Scalar curvature rigidity of convex polytopes

Abstract:

We prove a scalar curvature rigidity theorem for convex polytopes. The proof uses the Fredholm theory for Dirac operators on manifolds with boundary. A variant of a theorem of Fefferman and Phong plays a central role in our analysis.
