

Open PhD Position

At Eberhard Karls University of Tübingen, Department of Chemistry, the Institute of Physical and Theoretical Chemistry, the Chemical Nanospectroscopy group offers a PhD Position starting from 01.10.2020 for 3 years. The research topic of this position is applying high-resolution Raman and fluorescence spectroscopy to the investigation of fundamental optical, physical and chemical phenomena with resolutions far below the diffraction limit. Profile of the candidate: University degree (master or equal) in Physics, Chemistry or degree in Engineer; Familiar with Optical spectroscopy and microscopy; Team work skills; high oral and written communication skills in German or English. Applications and questions should be addressed to Prof. Dr. Alfred J. Meixner (alfred.meixner@uni-tuebingen.de) and PD Dr. Dai Zhang (dai.zhang@uni-tuebingen.de). For more information please see www.uni-tuebingen.de/nanospectroscopy.
