

We are hiring Postdocs and PhD students!

The Gehringer lab at the University of Tübingen, Germany, is looking for passionate researchers to join the team! Several PhD (65% E13) and postdoc positions in synthetic Medicinal Chemistry will be open in the coming months.

Your profile:

- Highly **motivated and dedicated** to your projects
- Commitment to **integration and collaboration** in a diverse and international research **team**
- Structured with a high degree of **autonomy and responsibility**
- Strong synthetic **Organic Chemistry skills** and a **Medicinal Chemistry mindset**
- Interest/basic or advanced experience in molecular biology and/or computational chemistry are desirable
- Commitment to **writing scientific publications** and supporting grant applications
- Engagement in **academic teaching** (especially for PhD candidates – German language skills are advantageous) and student supervision
- **Master or doctorate** in (Medicinal or Organic) Chemistry, a degree in Pharmacy or a related subject

What we offer:

- A great, international research group with **team spirit and social interaction**
- Fully equipped chemistry labs with **modern equipment** including automated flash columns, in-house NMR, LC- and TLC-MS, microwave reactor, analytical and preparative HPLCs, IR, and more
- Access to biochemistry labs and molecular modeling software
- Excellent **collaborative environment** at the interface of the Faculty of Sciences and the Faculty of Medicine of the University of Tübingen
- Ambitious **Medicinal Chemistry projects** at the edge of **translational** cancer research
- Cutting-edge research on modern **covalent targeting** strategies
- The opportunity to regularly attend **scientific conferences** to make networks and present research findings

Due to the anticipated responsibilities in teaching/supervision of student lab courses, doctoral candidates are expected to learn German if they have no knowledge of German language.

Please send your application by mail to Matthias.gehringer@uni-tuebingen.de specifying “PhD/Postdoc in Cancer and Covalency” in the subject line. Only complete applications with a letter of motivation clearly stating the match with our lab profile, a CV with grades and academic achievements, at least one reference letter and the above-mentioned catchphrase in the subject line will be considered.
