

Towards Pluriversal Thinking: Creating Inter-Knowledges – Negotiating Proximities

The multiple crises created by the current dynamics of globalization have called the concepts such as development, progress, and modernization into question. In the face of such a scenario, pluriversal thinking offers ways for imagining alternative social designs.

Towards this aim, the 2023 Summer School "North-South Encounters" encourages to engage in the ongoing debates in academia, activism, and cultural production that focus on the Pluriverse as a methodological and theoretical framework that has emerged in the context of post-developmental thought and epistemologies of the South. Looking for "a world into which many worlds fit", we follow Arturo Escobar's invitation to develop a capacity to design alternative worlds that challenge globalization's drive to homogenize what is diverse in principle. Thus, we take up the provoking impetus of new political ontologies, indigenous notions of the good living and calls for cognitive justice.

In accordance with the way which Global South studies address issues of globalization in a comparative and transdisciplinary perspective, the ICGSS Summer School will combine theoretical and methodological debates with scholars from the CIVIS network (from Europe and Africa), alongside colleagues from Asia-Pacific and Latin America, with a dialogue between academia, art, and political activism

Applications: Deadline: 12, June.
No travel funds available. 6- 9 ECTS
Please fill the application form and send to:
