

Schriftenverzeichnis 2002/03

581. M. Brinkmann, J.-C. Wittmann, M. Barthel, M. Hanack, C. Chaumont
Highly Ordered Titanyl Phthalocyanine Films Grown by Directional Crystallization on Oriented Poly(Tetrafluoroethylene) Substrate.
Chem. Mater. **2002**, *14*(2), 904-914
582. Y. Chen, L. R. Subramanian, M. Barthel, and M. Hanack
Synthesis and characterization of soluble axially substituted tetra(tert-butyl)gallium(III)phthalocyanines
Eur. J. Inorg. Chem. **2002**, (5), 1032-1034
583. M. Leuze, M. Hohloch, and M. Hanack
Electrochemical Investigations on PPV Model Compounds
Chem. Mater. **2002**, *14*(8), 3339-3342
584. C. Fietzek, M. Seiler, B. Görlach, P. Schuetz, U. Weimar, M. Hanack, C. Ziegler, H. Bertagnolli
Reversible intercalation of volatile amines into stacks of soluble phthalocyanines
J. Mater. Chem. **2002**, *12*(8), 2305-2311
585. S. I. Vagin and M. Hanack
Synthesis and spectroscopic properties of non-symmetrical benzo-annulated porphyrazines and their metal complexes.
Eur. J. Org. Chem. **2002**, (16), 2859-2865
586. M. Hanack, D. Dini, M. Barthel, S. Vagin
Conjugated macrocycles as active materials in nonlinear optical processes: optical limiting effect with phthalocyanines and related compounds
Chem. Record **2002**, *2*(3), 129-148.
587. Y. Chen, M. Barthel, M. Seiler, L. R. Subramanian, H. Bertagnolli, M. Hanack
An axially bridged indium phthalocyanine dimer with an In-In bond
Angew. Chemie, I. E. **2002**, *41*(17), 3239-3242
588. Y. Chen, L. R. Subramanian, M. Fujitsuka, O. Ito, S. O'Flaherty, W. J. Blau, T. Schneider, D. Dini, and M. Hanack
Synthesis and optical limiting properties of axially bridged phthalocyanines: [(tBu₄PcGa)₂O] and [(tBu₄PcIn)₂O]
Chemistry -A European Journal **2002**, *8*(18), 4248-4254
589. M. Hanack, B. Behnisch, H. Häckl, P. Martinez-Ruiz, K.-H. Schweikart
Influence of the cyano-group on the optical properties of oligomeric PPV-derivatives
Thin Solid Films **2002**, *417*(1-2), 26-31

590. Y. Chen, S. O'Flaherty, M. Fujitsuka, M. Hanack, L. R. Subramanian, O. Ito, W. J. Blau
Synthesis, Characterization, and Optical-Limiting Properties of Axially Substituted Gallium(III) Naphthalocyanines
Chem. Mater. **2002**, *14*(12), 5163-5168
591. M. Barthel, D. Dini, S. Vagin, and M. Hanack
An easy route for the synthesis of new axially substituted titanium(IV) phthalocyanines
Eur. J. Org. Chem. **2002**, (22), 3756-3762
592. T. Nagamura, A. Naito, I. Yoshida, Y. Chen, and M. Hanack
All-optical reflectance control based on photoinduced complex refractive index changes in guided mode thin films containing indium or gallium phthalocyanines
J. Nonlinear Optical Physics & Materials **2002**, *11*(3), 205-218
593. S. M. O'Flaherty, S. V. Hold, M. J. Cook, T. Torres, Y. Chen, M. Hanack, W. J. Blau
Molecular engineering of peripherally and axially modified phthalocyanines for optical limiting and nonlinear optics
Advanced Materials **2003**, *15*(1), 19-32
594. L. Kaufman-Orenstein, J. Y. Becker, J. Bernstein, J. M. Rubin-Preminger, and M. Hanack
Copper salts of rigid N,N'-dicyanoquinone diimine derivatives
J. Solid State Chemistry **2002**, *168*(2), 690-695
595. T. E. Youssef, M. Hanack
Synthesis and characterization of unsymmetrically substituted dienophilic nickel phthalocyanines for diels-alder reactions
J. Porphyrins and Phthalocyanines **2002**, *6*(9 & 10), 571-577
596. S. Vagin, M. Barthel, D. Dini, and M. Hanack
Synthesis and Characterization of (Octaaryl-tetraazaporphyrinato)indium(III) Complexes for Optical Limiting
Inorg. Chem. **2003**, *42*(8), 2683-2694
597. J. Gierschner, H.-J. Egelhaaf, H.-G. Mack, D. Oelkrug, R. Martinez-Alvarez, M. Hanack
Luminescence of conjugated molecules confined in nanochannels.
Synthetic Metals **2003**, *137*(1-3), 1449-1450.

598. S. Verma, M. Hanack
Synthesis of nitrido(phthalocyaninato)metal(V) complexes RnPCMN (M = Re, Mo, W) and new compounds with nitrido-bridges between rhenium and elements of the third main group.
Z. Anorg. und Allgem. Chemie **2003**, 629(5), 880-892.
599. D. Dini, M. Hanack.
Physical properties of phthalocyanine-based materials.
Porphyrin Handbook **2003**, 17, 1-36.
600. M. Hanack, D. Dini
Stacked polymeric phthalocyanines: synthesis and structure-related properties.
Porphyrin Handbook **2003**, 18, 251-280.
601. A. Naito, I. Yoshida, T. Nagamura, Y. Chen, M. Hanack
High speed reflection type all-optical modulation based on guided mode thin films containing phthalocyanine derivatives.
Shizuoka Daigaku Denshi Kogaku Kenkyusho Kenkyu Hokoku **2002**, 37 69-73.
602. L. Luer, H.-J. Egelhaaf, D. Oelkrug, G. Winter, M. Hanack, A. Weber, H. Bertagnolli
Oxygen diffusion in alkyl-substituted titaniumoxo phthalocyanine films.
Synthetic Metals **2003**, 138(1-2), 305-310.
603. Y. Chen, M. Hanack, S. O'Flaherty, B. Goerlach, A. Zeug, B. Roeder, W. Blau,
An Axially Grafted Charm Bracelet Type Indium Phthalocyanine Copolymer.
Macromolecules **2003**, 36(11), 3786-3788
604. Y. Chen, M. Fujitsuka, S. O'Flaherty, M. Hanack, O. Ito, W. Blau
Strong optical limiting of soluble axially substituted gallium and indium phthalocyanines.
Advanced Materials **2003**, 15(11), 899-902.
605. G. Y. Yang, M. Hanack, Y. W. Lee, Y. Chen, M. K. Y. Lee, D. Dini
Synthesis and nonlinear optical properties of fluorine-containing naphthalocyanines.
Chemistry--A European Journal **2003**, 9(12), 2758-2762.
606. M. Calvete, M. Hanack
A binuclear phthalocyanine containing two different metals.
European Journal of Organic Chemistry **2003**, (11), 2080-2083.
607. M. Hanack, D. Dini, M. Barthel, S. Vagin.
Phthalocyanines and related compounds as active materials for optical limiting.
Advances in Colour Science and Technology **2003**, 6(2), 47-54.

608. S. Vagin, M. Hanack.
Synthesis and characterization of soluble octaaryl- and octaaryloxy-substituted metal-naphthalocyanines.
European Journal of Organic Chemistry **2003**, (14), 2661-2669.
609. Y. Chen, L. R. Subramanian, M. Fujitsuka, O. Ito, S. O'Flaherty, W. J. Blau, T. Schneider, D. Dini, M. Hanack.
Synthesis and optical limiting properties of axially bridged phthalocyanines: [(tBu₄PcGa)₂O] and [(tBu₄PcIn)₂O]. [Erratum to document cited in CA138:48975].
Chemistry--A European Journal **2002**, 8(21), No pp. given.
610. S. M. O'Flaherty, S. V. Hold, Y. Chen, M. Hanack, W. Blau.
Reverse-saturable-absorption-based optical limiting properties of indium and gallium phthalocyanines and naphthalocyanines.
Proceedings of SPIE-The International Society for Optical Engineering **2003**, 4991(Organic Photonic Materials and Devices V), 183-193.
611. D. Dini, G. Y. Yang, M. Hanack.
Perfluorinated phthalocyanines for optical limiting: Evidence for the direct correlation between substituent electron withdrawing character and the nonlinear optical effect.
Journal of Chemical Physics **2003**, 119(9), 4857-4864.
612. C. G. Claessens, A. Gouloumis, M. Barthel, Y. Chen, G. Martin, F. Agullo-Lopez, I. Ledoux-Rak, J. Zyss, M. Hanack, T. Torres.
Second harmonic generation of a series of axially substituted titanium(IV) and gallium(III) tetra-tert-butylphthalocyanines.
Journal of Porphyrins and Phthalocyanines **2003**, 7(4 & 5), 291-295.
613. Y. Chen, S. M. O'Flaherty, M. Hanack, W. J. Blau.
New axially aryloxy substituted gallium phthalocyanines for nonlinear optics.
Journal of Materials Chemistry **2003**, 13(10), 2405-2408.
614. S. Vagin, G. Y. Yang, M. K. Y. Lee, M. Hanack.
Nonlinear optical absorption studies of new indium(III) porphyrazines: influence of additional benzo-annulation.
Optics Communications **2003**, 228(1-3), 119-125.
615. D. Dini, M. Barthel, T. Schneider, M. Ottmar, S. Verma, M. Hanack.
Phthalocyanines and related compounds as switchable materials upon strong irradiation: the molecular engineering behind the optical limiting effect.
Solid State Ionics **2003**, 165, 289-303.
