

The Department of Pharmacy and Biochemistry of the Faculty of Science at the University of Tübingen, Germany, invites applications for the position of

## **Full Professor of Structural Biology**

Starting date: at the earliest possible opportunity

A successful candidate for this position will be involved in teaching Biochemistry and conduct research in the field of structural biology with a focus on using cryo electron microscopy.

The professorship is integrated into the Interfaculty Institute of Biochemistry (IFIB). The IFIB is an internationally recognized integrated research center of the Faculty of Science and the Medical Faculty that covers all aspects of modern biochemical research. It is composed of ten research groups who participate in many local, national, and international research networks as well as DFG-funded Excellence Clusters.

An outstanding, internationally visible research profile in structural biology and the successful acquisition of competitive third-party funds are expected. As part of the IFIB, the prospective post holder is expected to pursue research approaches aimed at gaining mechanistic insights into cellular phenomena.

Commitment for interdisciplinary cooperation with research groups of the IFIB, other institutes at the University of Tübingen, and various local research networks, as well as participation in the teaching of biochemistry and in the academic self-administration of the University are expected.

Required qualifications include a PhD or equivalent international degree and postdoctoral qualifications equivalent to the requirements for tenure. This includes evidence of teaching effectiveness.

The University of Tübingen is particularly interested in increasing the number of women in research and teaching and therefore strongly encourages women to apply. In line with its internationalization agenda, the university welcomes applications from researchers outside Germany. Applications from equally qualified candidates with disabilities will be given preference.
