

TüNaProDoc

**Support Programme
of the TüSE for
Early Career Researchers
in the Doc Phase**

Do a PhD

**in educational sciences,
didactics, subject-specific
sciences in the field
of teacher education,
school research and teaching**

**Are you considering a doctorate in the field of
educational science or didactics?**

Perspectives

- An intensive and personally enriching engagement with a highly relevant topic awaits you.
- You will gain additional career options that build on your school related teaching background.
- With a doctorate, you will qualify for various areas of work at the university and you will have the option to perceive an academic career.
- A doctorate provides an excellent basis for activities in the fields of school management, educational administration (e.g. Kultusministerium, Landesinstitute) or in foundations.

What does TüNaProDoc offer you?

Support

- The requirements of a doctorate in the field of teacher education, school and teaching research are complex. We are looking forward to offer you help and orientation in your doctorate in the field of tension between different subjects, research methods and the demands of school practice.
- We will conduct an informal conversation with you about your research project and explore the possibilities for support together.
- We advise you individually and tailored to your needs and utilise our internal and external contacts.
- We organise an annual doctoral convention with expert lectures, poster presentations and extensive opportunities for exchange with other doctoral students and colleagues.
- We can organise 'tailor-made' ad hoc workshops (e.g. in the area of research methods) together with you.
- We offer you financial support for conferences, publications, proof-reading etc.
- We prepare an overview of relevant courses for you every semester.
- We provide you with information on conferences and training programmes offered by specialist and research societies.

As part of our annual awards procedure, we honour outstanding qualification works with an award ceremony and a prize money.

Networking

- You benefit from our cooperation with all teacher education faculties and institutions.
- You gain access to our network and can establish contacts.
- The TüSE summer party, the TüSE Doc regulars' table and the TüSE Doc Convention offer you many opportunities for informal dialogue.

We support you with our services in a complementary manner, not competing with the respective offers in the individual subjects.

Our TüNaProDoc Cooperation Partners:

Teacher Education Faculties:

Faculty of Science, Faculty of Humanities, Faculty of Economics and Social Sciences, Faculty of Protestant Theology, Faculty of Catholic Theology, Center for Islamic Theology

Superordinate Institutions:

Graduate Academy, University Library among others

Further Institutions:

Leibniz-Institut für Wissensmedien (IWM), Educational Administration among others

The Tübingen School of Education (TüSE)

... is a scientific institution for teacher education at the University of Tübingen. It integrates all those involved in teacher education in Tübingen. It is responsible for and innovates quality development in teacher education in studies, research, promotion of early career researchers and in transfer. It provides important impulses both internally and externally.
