

# GRK 2381

## cGMP: From Bedside to Bench

---

## Workshop for Junior Scientists

October 22, 2024, 9:00 – 12:00

IFIB Level 6, Room 6X38

Auf der Morgenstelle 34, 72076 Tübingen

**Dr. Daniel Stehle** (UC San Diego, Department of Pharmacology)

will hold a workshop on

### “Grant Application 101: Navigating Funding Opportunities and Writing Scientific (Application) Documents”

In this interactive two-part workshop, Daniel Stehle from the Jin Zhang Lab at UC San Diego will build a general basis for successful fellowship and grant applications. The workshop is aimed in particular at young scientists (doctoral students, postdocs) and is divided into two parts:

**Part 1** will provide helpful resources for identifying and selecting funding opportunities, discuss the application and scoring processes, and review some universal application documents.

**Part 2** will convey the principles of scientific writing in the context of – but not limited to – grant applications. Topics will include structuring of scientific texts, choosing appropriate scientific language, and illustrating information effectively.

By the end of this workshop, attendees should be equipped with the skills needed to navigate research funding opportunities to enhance their academic success.

As the number of participants is limited, **please register** for this event at the GRK 2381 Office: [petya.georgieva@uni-tuebingen.de](mailto:petya.georgieva@uni-tuebingen.de)

Places are allocated in the order in which registrations are received.

We hope to see many young researchers there!
