

AEG 2010

Yu Ye

I'm living in Nanjing/China

My occupation

I am currently working in Hohai University as an associate professor. My research interests focus on the experimental and modeling investigation of mixing processes in groundwater transport.

My AEG time

AEG time is the start of my research life about groundwater. Also, it is the start I really explored the outside world. AEG time is always kept in my deep mind and it still brings me happiness sometime when I recall my AEG life experience...
