

University of Tübingen & California State University Faculty Day "Sustainable Cities & Climate Change" - June 20, 2022

On June 20, 2022 the University of Tübingen will host the International Faculty Day "Sustainable Cities & Climate Change". The Faculty Day is organized by the California State University, International Programs, and the Platform Environmental Systems at the University of Tübingen.

The Faculty Day "Sustainable Cities & Climate Change" offers a Keynote-Lecture „Sustainable Development and the University of Tübingen “ and presentations in the field of sustainable urban planning, sustainable mobility, LebensPhasenHaus (how do we want to live in future) as well as land-use conflicts and comparative policy analysis in the context of climate change. The Faculty Day is part of the celebration of the 25th Anniversary of the student exchange program between the California State University (CSU), USA, and the Universities in Baden-Württemberg. The Ministry for Science, Research and Arts Baden-Württemberg and the CSU also support research cooperation in the field of global change research between the collaborating universities. A CSU Faculty Delegation of around 25 professors and representatives from CSU visits Baden-Württemberg in June 20.-24. 2022. The goal is to build a base of support for the existing exchange programs.

Location: University of Tübingen, Alte Aula, Münzgasse 30

Program Monday, 20 June 2022

08:30 h – WELCOME AND INTRODUCTION
