

Entangled Knowns and Unknowns: Rethinking Knowledge in Medical Past

Tübingen, June 27-28, 2025

As part of the *China Wissen und Nichtwissen* series at China Centrum Tübingen, this mini-workshop explores the circulation, transformation, challenges and uncertainties of knowledge in the realm of medicine. While classical texts and long-standing traditions have shaped the foundations of Chinese medicine, historical shifts, cross-cultural exchanges, and epistemic crises have continuously reshaped its landscape.

How did physicians navigate between established knowledge and new discoveries? How were medical ideas reinterpreted, challenged, or even lost over time? What tools and techniques did they employ to investigate the mysteries of the human body?

Bringing together young scholars, this workshop provides a platform to examine the transmission of medical knowledge across different historical contexts, fostering discussion on how ideas, practices, and theories evolved through dynamic processes of adaptation and exchange.

Location: China Centre Tübingen, Hintere Grabenstraße 26, 72070 Tübingen

Friday, 27th of June 2025

morning Arrival in Tübingen

13 - 15, c.t. **Dr. Yijie Huang** (University of Heidelberg)

The Drifting Touch and the Multiple Tangibility: Rethinking Pulse Diagnosis between Early Modern China and Europe

15 - 15.30 Coffee Break

15.30 - 17 Exhibition Tour: **Anatomy Unbound**

Old Anatomy (Alte Anatomie) | Österbergstraße 3 | 72074 Tübingen

17 - 18 City Walk

18 - 20 Dinner

Restaurant: 1821, Wilhelmstraße 3, 72074 Tübingen

Hotel: Hotel Konzept, Horemer 16, 72076 Tübingen

Saturday, 28th of June 2025

8.30 - 9.30 Breakfast
