

**Forschungsseminar AG Geoökologie
(GEO 95)
Dienstag, 12.15-13.45 Uhr
W400 (Westbau Geographie)**

Stand: 10.04.2026

- | | |
|-----------|--|
| Datum | Vorträge |
| 28.04.26 | Debanjan Ghosh (PhD): <i>Decoding the stable isotope signature of the non-exchangeable oxygen fraction of bulk soil organic matter: methodological prerequisites</i> |
| 05.05.26 | Leon Köhler (BSc): <i>Auswirkungen der Abholzung des tropischen Regenwaldes im Kongobecken auf lokale Klimaparameter anhand von Fernerkundungsdaten</i> |
| 19.05.26 | Felipe Aburto (Texas AM): <i>Uncovering the impacts of land-use change and intensification on soil functionality</i>
Joshua Häußler (MEd): <i>Untersuchungen zur Mobilität von Schwermetallen in der Neckaraue bei Neckarsulm</i> |
| 02.06.26 | Ashis Biswas (ISER Bhopal): <i>Interactions of arsenic and selenium species with natural organic matter</i>
Nina Porath (MSc) & Finn Beckmann (BSc): <i>Dragonfly migration along the Baltic Coast</i> |
| 23.06.26 | Emma Colbach (MSc) & Jens Grammer (PhD): <i>Characterization of phosphorus pools in cave sediments</i>
Nikita Mikhaylenko (PhD): <i>Land-atmosphere CO₂ flux dynamics in a Siberian Arctic permafrost area during the non-vegetation period</i> |
| 14.07.26 | Finn Linke (BSc): <i>Effects of insect exclusion on nutrient cycling, erodibility and infiltration dynamics in soils</i>
Harald Neidhardt (Postdoc): <i>Research in action: Overview of current projects</i> |
| 21.07.26 | Pauline Röhner (PhD): <i>P-Niche – Parent material and land-use intensity as driver for niche complementarity in phosphorus mobilization between plants and microbes</i>
Haikuo Zhang (PhD): <i>Effects of tree diversity on multi-element stoichiometry of microbial biomass</i> |
| 23.07.26* | Florian Jueterbock (PhD): <i>Relations of plant diversity, functional traits and nutrient availability to greenhouse gas emissions in alpine peatlands</i> |

*Online Vortrag außerhalb der Reihe, bereits um 08.45 Uhr, Zoom Link auf Anfrage bei H. Neidhardt
