

Certificate Independent Studies

The Independent Studies module in the Master's program in Nanoscience, worth 27 ECTS credits, must be supervised by a mentor.

Submit the completed form to the Examination Office after completing the Independent Studies. Enter the details of your project in this form. You can only participate in the Independent Studies with the confirmation of the present exposé/study plan (for all variants!) as well as the qualifying academic achievements with the date and signature of your mentor.

A maximum of 9 ECTS credits can be credited for the module after the preliminary work (3 basic modules, 2 focus modules) has been completed. You must provide your mentor with proof of the preliminary work in the form of the corresponding study performance certificates and the transcript.

Your project will be finally approved before commencement with the signature of one of the coordinators and can only be recognized as an “Independent Studies” module with this signature.

Name:

Matriculation number:

Planned project				Name Mentor
Semester abroad	Internship scientific institution	Internship industries	Study in Tübingen	
				← brief description (for studies in Tübingen, a cross is sufficient)
				← date
Exposé				Date Signature
☐ yes ☐ no				
Comments				
Academic achievements (3 Basic Modules, 2 Focus Modules)				Date Signature
☐ yes ☐ no				
Comments				
Confirmation: Degree program coordinators (Prof. Schöpe or Dr. Schrenk)				Date Signature

Courses attended during studies abroad or studies in Tübingen are summarized here.

For internships, the final report is certified here.
