Semester Abroad: Visiting Student Program

First Semester Abroad at Hanyang

Hanyang University offers exclusive pathways for high-achieving first-year students to begin their undergraduate career with a global perspective.

Take the World by the Horns

Hanyang serves as a primary global site for UT Austin's innovative FSA model. We host incoming freshmen before they even arrive on their home campus, providing a curated curriculum that blends Hanyang's technological prowess with core humanities and social science requirements.

ILLINOIS TECH

Ascend Abroad Program

As the exclusive international host for the Ascend Abroad Program, Hanyang provides a formalized, credit-bearing framework for Illinois Tech's top-tier scholars to engage in high-level research and technical study.

Faculty-Led Program: Summer & Winter Schools

CSULB Brand Workshop

A testament to longitudinal success, this program has operated for three consecutive years as of 2025 with over 100 accumulated participants.

Multidisciplinary Innovation & Global Health

Hanyang hosts diverse cohorts from Tec de Monterrey across various fields. In the 2025 HIWS alone, we welcomed 31 students specializing in Engineering, Sciences, Architecture, and Health Sciences, with an expanded cohort for 2026 HISS.

SDG-Focused Field Experience

This January and August program combines academic coursework with impactful community engagement in Korea and the Philippines. It provides 30+ students with hands-on social work experience focused on global sustainability and real-world social impact.
