Are you interested in data science? Do you enjoy working with R and/or Python? Are you passionate about shaping how students learn to use these tools for data analysis? If so, we'd love to hear from you! We're currently looking for a ...

Student Assistant (*Studentische Hilfskraft (m/w/d)*) in Data Science (approx. 25 h/month)

What we are looking for:

- You are an above-average student at the School of Business and Economics or in a related field with an interest in data science.
- You have some knowledge of R and/or Python and experience in (or a willingness to learn) data analysis.
- You are a reliable and flexible team player with an organized and detail-oriented work style.

What you can expect:

- Contribute to the preparation and delivery of our courses in data science and related subjects.
- In particular, support our undergraduate course *Introduction to Data Science* by revising course material (using LaTeX or R Markdown), developing code elements in R and Python, and crafting empirical examples in these languages.
- Co-teach the accompanying tutorial: support students in their first steps with R and Python, and assist with other teaching-related tasks.
- Be part of an open, inclusive, and supportive team dedicated to high-quality teaching.

Interested?

If these descriptions appeal to you, we look forward to your application! The position is available as soon as possible and is initially offered for 6 months, with the possibility of extension.

Please send the required documents (a letter of motivation, CV, and Transcript of Records) as a single PDF file by **December 6, 2026,** via e-mail to Dr. Matthias Ritter, m.ritter@uni-tuebingen.de.
